Have You Had a Recent Cerebro-Vascular Accident?

If Yes, We'd be Interested in Speaking with You!

Researchers from UBC's Department of Occupational Science and Occupational Therapy, as well as GF Strong Rehabilitation Centre, are investigating arm and hand movements in people who have had a cerebro-vascular accident (CVA). We are interested in individuals who:

- Have had a CVA at least 6 months ago;
- Are able to pick up a bean bag and put it on a shelf with your affected arm and hand; and
- Are between the ages of 35 and 80;

Interested participants will be required to attend *two* research sessions, and **will receive monetary compensation as a token of appreciation for volunteering.**

If you would like more information about this study, or have questions, please contact Stephen Teng at 604-822-7412, or email at ot.ubc.study@gmail.com.

This study has been reviewed and approved the Behavioural Research Ethics Board of the University of British Columbia
